**Godwon No. 846, KWC Steel Market, Plot No. 846, Road  
No. 09, Kalamboli, Panvel, Raigad. 410218**

### About Us

Established in 2019 as a basic Cutting unit of stainless steel sheets and coils in the Kalamoli, Navi Mumbai Steel market, it is very popularly known as “M/s. Steelex India”. Our services of shearing and straightening ranged from 0.3mm – 3mm. It was the first stepping stone in our journey toward the future. Due to the hard work and Dedication of Mr. Avinash Kad, we received overwhelming Trust and Support from the Metal Market of Mumbai, Gujrat, Comibtoor . And Thus, we could consistently focus on the growth of our company.

We give prime importance and are always inclined towards continuous improvement of the effectiveness of the quality management system. We aim to achieve the maximum level of customer satisfaction. We have successfully provided the best possible Cut to length facility, No.4 matte Finishing, and Packing quality in processing Stainless Steel sheets, Plates, and Coils.

M/s. Steelex India was incorporated in 2019 to bring good quality and finish in S S Cutting. Our company is equipped with the most modern and highly sophisticated machinery in an area spanning over 10000 sq. ft. We provide customers with a wide range of services and have met their needs within India.

We have been selected as a Registered Vendor by numerous companies across India for Stainless Steel Cutting on our experience and expertise.

Our long-term goal is to become India's One-Stop Shop for all stainless steel-process requirements. We owe a debt of gratitude to our loyal customers who have helped us on our path to success.

## JOB SPECIFICATION & FACILITIES

### ❖ Cutting

Cutting (Cut to Length) Cutting can be done of various material Such as Stainless Steel, Alloy Steels, Copper, Aluminium, Brass, etc. The main distinguishing factors of our Cutting quality are

- Accurate Length with Minimum Tolerance
- Right Angle across Diagonal
- 100% Scratch less Material
- Cutting thickness Range: 0.3mm to 10.00mm
- Cutting Width Range: 100mm to 2500mm

### ❖ Shearing

Shearing One of our company's Precision Job work categories is Shearing. The Dimension of the Sheet Biscuit Piece can be provided with +/- 0mm Tolerance. The Distinguishing factors of Shearing Services are

- Accuracy of Dimension on all sides Tolerance can be maintained at +/- 0mm over all edges.
- Shearing can be Done with ILP
- PVC can be applied as per the required Size and Dimension ranging from 100mm to 2000mm
- Micro Packing Standards for Biscuit Material Handling.

#### ❖ NO.4 Surface Polishing

No.4 Matte Finish materials are in great demand worldwide. The central aspect of this service is to maintain finish consistency for every customer as per their requirements. The Distinguishing Factors of Matte Finishing Services are Working Type: Wet

Thickness Range: 0.4mm to 4.00mm

Width range: 200mm to 1600mm

Customer-wise Matte Configuration data Sheet

Surface Roughness Report of every material.

Consistency of Matte finish throughout every Processed Lot 9 Different types of Finish for the various finish.

#### PVC Coating / Lamination

Every company prefers the PVC-coated material to prevent the material surface from Scratches and Damage. The Distinguishing Factors of PVC Coating Service are Wide range of PVC type, quality and material Only Industrial and Government approved PVC is Used

Temporary PVC, PVC for Bending process, PVC for Laser Cutting, PVC for Fiber Co2 Cutting

PVC application only through machine. No Hand Pasted PVC.

❖ **Storage Handling**

The main problem faced by Customers in the Other Steel market is the damage due to material in Open Plots. We have a Solution to this as well

Completely Covered Shed for material Storage. No gathering of Water in Our premises during rainy season  
Overhead Cranes for Loading/Unloading of material  
One Crane with lifting Capacity 25 MT

### Up coming Process

#### Scotch-Brite with No.4 Polishing

Scotch-Brite is a brushing process that makes the stainless steel surface perfectly uniform. It is practically without any traces since we use nylon material infused with abrasive grains of aluminum oxide and silicon carbide.

Standardize SS Scotch Brite Finish sheets are available. Moreover, the Scotch Brite Finish sheets are professionally monitored under strict technical observation and produced with utmost superior quality and excellence in design. Thus, to acquire better abrasives, utilize a semi-dull finish with uniform grains. With a low degree of reflectivity and unidirectional surface, this finish has smooth, delicate, and lovely grains.

M/s Steelex India innovatively produce Scotch Brite Finish stainless steel sheets. Furthermore, our scotch bright sheets are in compliance with set industrial standards. In Addition, our scotch bright sheets are available in different configurations to suit the different requirements of the client.

The SS 304 Scotch Brite Finish sheets can be used for different purposes like luxury interior & exterior decor, elevator door/cabin, and many more places.

This process with semi-automatic imported machinery which increase production quality, production capacity with new production technology.

## Industries We Serve

Pharma Equipment Manufacturing

Sanitary & Bath Ware Industry

Lift & Elevator Industry

Automobile Industry

Kitchen Equipment Manufacturing

All Types of Fabrication Industries

We are providing all stainless solution services with the help of our expert team, knowledge and best experience along with best business practice.
